

Marginal value theorem

Influences on foraging behavior

Environmental factors
Sensory factors
Social factors

Engage in foraging based on internal state and sensory information

Traverse varied, complex environments

Patch p-2

Patch p-1

Arrive at patch p

Optimal time to leave

Resource intake

Use internal state to consider the nutritional landscape

Exploit patch discovered by conspecifics

Disengage to avoid competitors and predators

Distal cues
Local cues
Assess patch properties

Decide where to go next –
Trapline?
